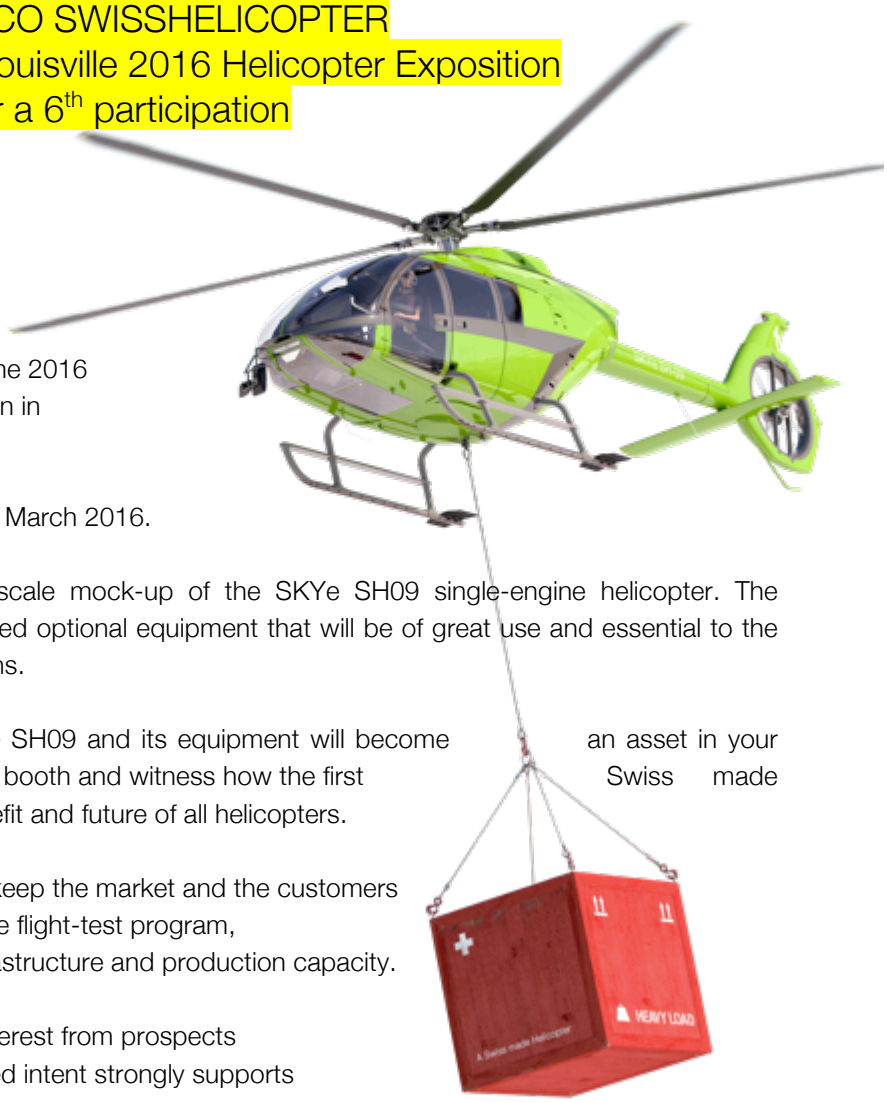
SKYe SH09 A Swiss made helicopter

Communiqué de Presse – Presse Informationen – Press Release – Communicado de Presse

MARENCO SWISSHELICOPTER proud to join the Louisville 2016 Helicopter Exposition for a 6th participation



Switzerland, January 25th, 2016

MARENCO SWISSHELICOPTER is pleased and proud to announce its 6th participation at the Heli-Expo in the USA on the occasion of the 2016 Helicopter Association International Convention in Louisville, Kentucky.

The event will be held from the 1st to the 3rd of March 2016.

Marenco Swisshelicopter will display a full-scale mock-up of the SKYe SH09 single-engine helicopter. The company will also be featuring newly developed optional equipment that will be of great use and essential to the utility and multi-mission segments of operations.

Join the Swiss team and check-out how the SH09 and its equipment will become an asset in your toolbox. Join Marenco Swisshelicopter on the booth and witness how the first Swiss made helicopter is raising the standards for the benefit and future of all helicopters.

With this participation, the team is excited to keep the market and the customers informed about the on-going progresses of the flight-test program, about the development of the company's infrastructure and production capacity.

The team is also targeting to generate new interest from prospects around the world as every order and expressed intent strongly supports the development.

SKYe SH09 A Swiss made helicopter

Communiqué de Presse – Presse Informationen – Press Release – Communicado de Presse

About the SKYe SH09 helicopter:

With a Maximum Take-Off Weight of 2,650 kg (5,842 lbs) the SKYe SH09 helicopter offers exceptional hot and high performance, a low noise signature thanks to the newly developed dynamic assemblies and shrouded tail-rotor.

The modularity of the cabin makes the most of the flat floor and the unique high ceiling concept, offering multiple seating arrangements of 1 Pilot + up to 7 passengers, all with individual crashworthy seats. The rear access to the cabin is facilitated by the large clamshell doors; addressing the passenger transport and emergency evacuation roles of the helicopter.

With a fast cruise speed of 260 km/h (140 knots) it will also offer very long range - in excess of 800 km (430 nautical miles) with standard fuel tanks. SKYe SH09 is of particular interest to operators who wish to avail of a remarkably versatile machine with additional power, greater payload capacity, and an augmented sling load capability of 1,500 kg (3,300 lbs).

About MARENCO SWISSHELICOPTER (MSH):

The MARENCO SWISSHELICOPTER COMPANY is the result of combining the vision of our investors, the engineering expertise of Martin Stucki and a team of highly qualified helicopter specialists, pilots and aviation experts. Marenco Swisshelicopter Ltd. was founded in 2007 for the direct purpose of developing, building and commercializing new concepts of light turbine helicopters. With this industrial visionary concept, Marenco Swisshelicopter developed a new generation of helicopter built with a design that concentrates on the key notion of competitive superiority, modularity, advanced ergonomics and with the integration of the best choice of materials.
