Marengo Swisshelicopter

celebrates 13x additional orders signed at the
Heli-Expo 2015 with an order-book that now reaches
72X orders for the SKYe SH09

and confirms supply-chain milestone with the selection of
key partners for the serial production of the SKYe SH09 helicopter

Pfäffikon, March 19th, 2015

After a fifth participation at the Heli-Expo in the United States, Marengo Swisshelicopter is pleased to announce the signature of 13x additional letters of intent for the SKYe SH09 helicopter, reaching a total of 72x units in the order-book, with deliveries ranging from 2016 and onwards.

Part of these orders are destined to commercial operators on the American markets for operations ranging from Heli-Taxi in South America to charter and sightseeing in the USA. The remaining orders are spread throughout the world and include the announced first sale to a professional charter and training operator in South Africa.

During the Heli-Expo in Orlando, the team of Marengo Swisshelicopter reported the result of the teamwork and accomplishments that were performed in 2014 and which lead to the achievement of the first flight as well as the start of the intensive flight test campaign that is now being actively pursued.

With the presentation of a modified full carbon 1:1 mock-up of the SKYe SH09, the Marengo Swisshelicopter booth was a point of attraction on the show. The aircraft embodied the latest modifications with the High visibility cockpit and new floor windows as well as the instrument panel that was developed and installed on the flying prototype.

The aircraft was displayed in bright and dynamic colours and generated positive response with confirmed interest from operators and helicopter users around the globe.

Bruno Gubser, Marengo Swisshelicopter Chief Operating Officer also reports having reached milestone discussions and agreements with the advance selection of HONEYWELL, SAGEM and TENCATE as key suppliers in preparation of the serial production of the SKYe SH09 helicopter and for respectively the helicopter HTS 900-2 turbine, the ICDS-8A Glass Cockpit suite and the TC250 epoxy resin system.

Keep your eyes on the SKYe SH09... Now in the Sky !

About the SKYe SH09 helicopter:

With a Maximum Take-Off Weight of 2,650 kg (5,842 lbs) the SKYe SH09 helicopter offers exceptional hot and high performance, a low noise signature thanks to the newly developed dynamic assemblies and shrouded tail-rotor.

The modularity of the cabin makes the most of the flat floor and the unique high ceiling concept, offering multiple seating arrangements of 1 Pilot + up to 7 passengers, all with individual crashworthy seats. The rear access to the cabin is facilitated by the large clamshell doors; addressing the passenger transport and emergency evacuation roles of the helicopter.

With a fast cruise speed of 260 km/h (140 knots) it will also offer very long range - in excess of 800km (430 nautical miles) with standard fuel tanks. SKYe SH09 is of particular interest to operators who wish to avail of a remarkably versatile machine with additional power, greater payload capacity, and an augmented sling load capability of 1,500 kg (3,300 lbs).

About MARENCO SWISSHELICOPTER (MSH):

The MARENCO SWISSHELICOPTER COMPANY is the result of combining the engineering expertise of Marengo Ltd. and a team of highly qualified helicopter specialists, pilots and aviation experts. Marengo Swisshelicopter Ltd. was founded in 2007 for the direct purpose of developing, building and commercializing new concepts of light turbine helicopters. With this industrial visionary concept, Marengo Swisshelicopter developed a new generation of helicopter built with a design that concentrates on the key notion of competitive superiority, modularity, advanced ergonomics and with the integration of the best choice of materials.
