About the SKYe SH09 helicopter:

With a Maximum Take-Off Weight of 2,650 kg (5,842 lbs) the **SKYe SH09** helicopter offers exceptional hot and high performance, a low noise signature thanks to the newly developed dynamic assemblies and shrouded tail-rotor.

The modularity of the cabin makes the most of the flat floor and the unique high ceiling concept, offering multiple seating arrangements of 1 Pilot + up to 7 passengers, all with individual crashworthy seats. The rear access to the cabin is facilitated by the large clamshell doors; addressing the passenger transport and emergency evacuation roles of the helicopter.

With a fast cruise speed of 260 km/h (140 knots) it will also offer very long range - in excess of 800km (430 nautical miles) with standard fuel tanks. **SKYe SH09** is of particular interest to operators who wish to avail of a remarkably versatile machine with additional power, greater payload capacity, and an augmented sling load capability of 1,500 kg (3,300 lbs).
