

SKYe SH09

A Swiss made helicopter

Communiqué de Presse – Presse Informationen – Press Release – Comunicado de Presse

Marengo Swisshelicopter and the Swiss Aerospace Cluster

kick-off new Helicopter Section

Switzerland, April 28th, 2016

The Swiss Aerospace Cluster links Aerospace companies in Switzerland for the past 6 years. The joint activities in the network focus on promotion through exhibitions, support in PR activities, knowledge transfer and innovation promotion.

In mid-April, the Swiss Aerospace Cluster, Marengo Swisshelicopter and Eurocoles Suisse founded the new Helicopter Section, a contact point for the supply of parts, production, operation, training, maintenance and research in the helicopter field. The focus of the Cluster also includes cooperation in the promotion and support for product development. Various centers of competence, or mini-clusters, are to be setup, which will be supported by the Helicopter Section. One of these, is already located in Mollis, Glarus Nord, where various companies such as Marengo Swisshelicopter, Heli Linth, Swiss Skyways Services and Eurocoles are based. The region is attracting further high-tech aerospace companies in setting up operations there.

About the SKYe SH09 helicopter:

With a Maximum Take-Off Weight of 2,650 kg (5,842 lbs) the **SKYe SH09** helicopter offers exceptional hot and high performance, a low noise signature thanks to the newly developed dynamic assemblies and shrouded tail-rotor.

The modularity of the cabin makes the most of the flat floor and the unique high ceiling concept, offering multiple seating arrangements of 1 Pilot + up to 7 passengers, all with individual crashworthy seats. The rear access to the cabin is facilitated by the large clamshell doors; addressing the passenger transport and emergency evacuation roles of the helicopter.

With a fast cruise speed of 260 km/h (140 knots) it will also offer very long range - in excess of 800 km (430 nautical miles) with standard fuel tanks. **SKYe SH09** is of particular interest to operators who wish to avail of a remarkably versatile machine with additional power, greater payload capacity, and an augmented sling load capability of 1,500 kg (3,300 lbs).

About MARENCO SWISSHELICOPTER (MSH):

The **MARENCO SWISSHELICOPTER COMPANY** is the result of combining the vision of our investors, the engineering expertise of Martin Stucki and a team of highly qualified helicopter specialists, pilots and aviation experts. **Marengo Swisshelicopter Ltd.** was founded in 2007 for the direct purpose of developing, building and commercializing new concepts of light turbine helicopters. With this industrial visionary concept, **Marengo Swisshelicopter** developed a new generation of helicopter built with a design that concentrates on the key notion of competitive superiority, modularity, advanced ergonomics and with the integration of the best choice of materials.
