**MARENCO SWISSHELICOPTER
celebrates its 5th participation at the HeliExpo**

Switzerland, February 5th, 2015

MARENCO SWISSHELICOPTER is pleased and proud to announce its 5th participation at the Heli-Expo in the USA on the occasion of the 2015 HAI Convention that will be held from the 3rd to the 5th of March, in Orlando, Florida.

Since the introduction of the SKYe SH09 first prototype, also displayed at the Anaheim 2014 event, Marengo Swisshelicopter has been able to perform the maiden flight on October 2nd 2014 in the heart of Switzerland and in a record span of 11 months.

Now all targets are focused on the construction of the 2nd prototype, the preparation of the assembly plant and processing of the required approvals to ensure that the aircraft will meet the highest international standards.

With this participation, the team is expecting to keep the market and the customers informed about the on-going progresses in the testing of the aircraft and most important to generate new interest from prospects around the world as every order and letter of intent supports the project in the long term.

SKYe SH09

A Swiss made helicopter

Communiqué de Presse – Presse Informationen – Press Release – Comunicado de Presse

About the SKYe SH09 helicopter:

With a Maximum Take-Off Weight of 2,650 kg (5,842 lbs) the **SKYe SH09** helicopter offers exceptional hot and high performance, a low noise signature thanks to the newly developed dynamic assemblies and shrouded tail-rotor.

The modularity of the cabin makes the most of the flat floor and the unique high ceiling concept, offering multiple seating arrangements of 1 Pilot + up to 7 passengers, all with individual crashworthy seats. The rear access to the cabin is facilitated by the large clamshell doors; addressing the passenger transport and emergency evacuation roles of the helicopter.

With a fast cruise speed of 260 km/h (140 knots) it will also offer very long range - in excess of 800km (430 nautical miles) with standard fuel tanks. **SKYe SH09** is of particular interest to operators who wish to avail of a remarkably versatile machine with additional power, greater payload capacity, and an augmented sling load capability of 1,500 kg (3,300 lbs).

About MARENCO SWISSHELICOPTER (MSH):

The **MARENCO SWISSHELICOPTER COMPANY** is the result of combining the engineering expertise of **Marengo Ltd.** and a team of highly qualified helicopter specialists, pilots and aviation experts. **Marengo Swisshelicopter Ltd.** was founded in 2007 for the direct purpose of developing, building and commercializing new concepts of light turbine helicopters. With this industrial visionary concept, **Marengo Swisshelicopter** developed a new generation of helicopter built with a design that concentrates on the key notion of competitive superiority, modularity, advanced ergonomics and with the integration of the best choice of materials.
